- Power distribution unit
- Eaton UPS

KA-band VSAT THOR 7

The THOR 7 High Throughput Satellite (HTS) provides regional coverage with a favorable look angle over the main European shipping lanes and utilizes relatively small spot beams, which provide unprecedented high-power performance for maritime applications.

Supported by the iDirect next generation Velocity© platform, the iDirect platform offers automatic and seamless spot beam hand over – a necessity for a market that relies upon continuous connectivity. The THOR 7 HTS delivers downlink speeds anywhere between 512kbps and 24Mbps and uplink speeds between 128kbps and 6Mbps.

Installation

Fixed installation fee within the Netherlands of € 1500, which is excluding transport, customs, travel- and accommodation charges.

All-inclusive package monthly fee	36 months	60 months
512kbps/128kbps (down/up) 1:10	\$ 899	\$ 625
1024kbps/256kbps (down/up) 1:10	\$ 1019	\$ 729
2048kbps/512kbps (down/up) 1:10	\$ 1249	\$ 959
4Mbps/1Mbps (down/up) 1:10	\$ 1685	\$ 1389
